

# Blockbusters SendEasy Setup and Installation

## 1. Apply for an account

- Register on SendEasy by clicking [here](#) or visiting <http://www.sendeasy.co.za> and clicking the Register link at the top right of the page.
- Send us an email to [support@sendeasy.co.za](mailto:support@sendeasy.co.za) to setup your API account and include the following information:
  - The email address used in registration on SendEasy
  - Store location
- We will reply to the email and detail the API credentials that will be used in the RAP SMS setup.

## 2. Download and install SendEasy

- Click <http://www.sendeasy.co.za/download/BulkFileSMS/BulkFileSendSetupFull.zip> download the installation files.
- Extract the zip file to a location on your hard drive.
- Double click the setup.exe file to begin installation
- Follow the prompts in the installation wizard until setup is complete.
  - There are 2 prerequisites required to install SendEasy:
    - Windows Installer 3.1 or above
    - .NET Framework 2.0
  - The install for both prerequisites are included in the installation should they not already be setup on the PC.  
Should the wizard prompt you, click next or ok to install the prerequisites. (note that the .NET Framework will take a few minutes to install)

## 3. Update the RAP SMS Parameters

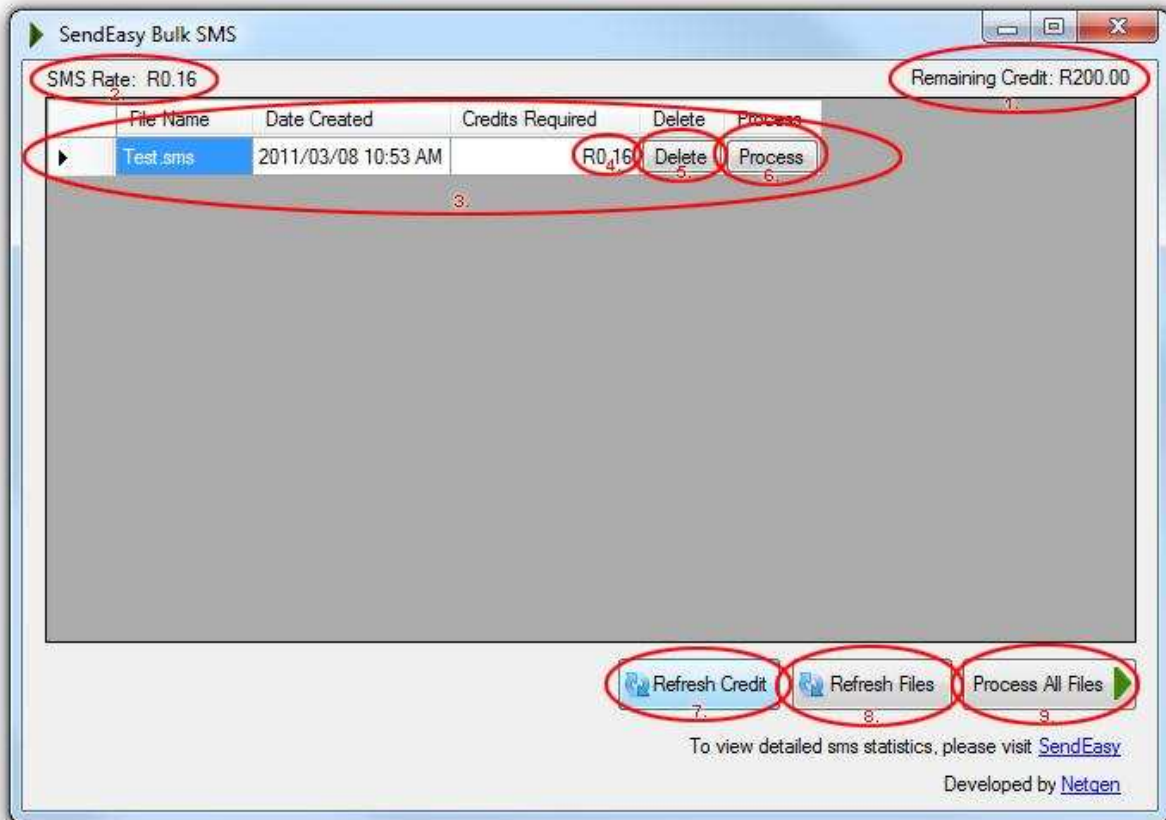

- Click the **Tools Selection-> SMS Subsystem -> Maintain SMS parameters** from the menu
- On the **SMS Parameters** tab change the **Sms User name** and **SMS User passwrd** to the username and password sent in the API credentials email.
- Click on the **SMS Directories** tab and change **SMS Pgm** to the location you selected during installation for SendEasy.  
The default location is `c:\Program Files\Netgen\SendEasy Bulk File SMS\BulkFileSend.exe`

## 4. Top up your account with credits

- Login to SendEasy using the email address and password supplied during registration.
- Click the **Buy Credits** button at the top of the page and follow the onscreen prompts to purchase credits.

## 5. Sending SMS's through RAP

- Sending SMS's through RAP will now cause the SendEasy Bulk SMS application to load.
- The screen and details on how to use the application are as follows:

1. Remaining Credit show the amount of credit available on your account
2. SMS Rate shows the cost per SMS.
3. The table lists all the SMS files that RAP has configured to send.
4. Credits Required show the amount of credit that will be needed to send a particular SMS file.
5. Delete allows you to delete the file that RAP configured.
6. Process allows you to process an individual file and send to all recipients in the file.
7. Refresh Credit will update the Remaining Credit in point 1.
8. Refresh Files will update the list of files in point 3.
9. Process All Files will go through each file in point 3 and send to all recipients in the file.
