

StarLite on the Web Description Document By The Software Clinic Date: 4th of September 2016

The StarLite online web application allows your Internet customers to interact dynamically with your in-store retail or rental catalogues. There are no other systems that allow this type of flexibility. What this means is that your brick and mortar store continues to operate as a normal point-of-sale countertop operation as well as serving as a platform for your Internet customers.

About StarLite

StarLite is retail and rentals automated website building process that reads the in-stores stock database records. The information from these records is then used to produce and update your website content without the need of a web-master or web-designer.

Stock records can also have associations to many types of Meta data that will be displayed on StarLite. For example video footage showing how simple it is to switch on a power generator; and if required the relevant specifications can also be display in a PDF document. Other types of Meta data supported are pictures, galleries, iframe links to other websites and transparent annotations showing pricing details and on sale tags etc. StarLite can run on a home or office i5 type computer (Windows 7,8 or 10).

Add a variety of Meta data to your online stock records:

- YouTube or Vimeo video footage
- Gallery of pictures with titles and description for each
- Customer May Also Like stock card links
- Assign GPS Google map coordinates to stock records and display their locations on the web
- Add meaningful Icons to stock records from your icon tray with popup descriptions of their meaning

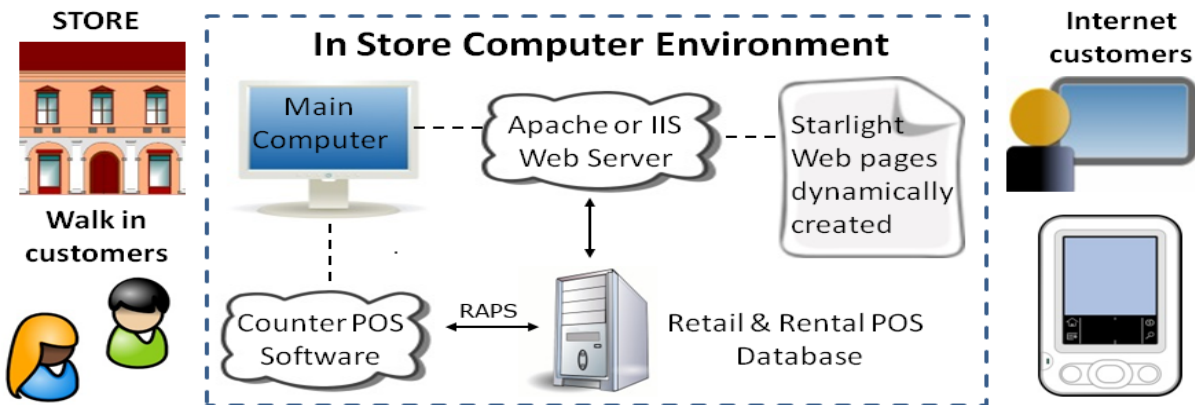

StarLite provides a professional eCommerce Internet solution that also creates a transaction channel to the in-stores counter-top point-of-sale (POS) system. This dynamic channel communicates business generated transactions between potential Internet customers and the in-stores point-of-sales (pos) RAPS database.

StarLite keeps the in-store stock quantity levels up to date as the in-store and Internet transactions are processed. Also orders are easily managed and customers are automatically emailed on the progress of their online purchases.

With StarLite customers can purchase or rent merchandise from your brick and mortar store or do these transactions from the comfort of their computers or hand held mobile devices. As an entrepreneur your business models can take on many diversified dimensions, catering for the modern world trends.

This retail rental web app is perfect for **costume, tool, photographic, movie, games, boat, hardware, home industry, real-estate agents** and other types of rentals and retail sales.

----- PRE-AMBLE -----

RAPS counter software serving a walk-in customer (customer pictures optional)

The screenshot shows the 'Rental and Retail Checkout' window for '2102, Mr. Aaron, Bill'. It includes a 'Customer Picture' section with multiple photos, a 'Memo' window with the text 'Remarked that he was impressed with our service!!!', and a table of items:

RENTAL TAKEN - TRY RESERVING
Name: Storm Trooper
Category: Eighties Costumes
Shelf: 15/10/2014
Stock Number: C19

Rental Rates	
Day rate:	R150.00
Extra day rate:	R50.00
Refundable deposit:	R250.00

Summary: The Imperial Stormtroopers are fictional soldiers from George Lucas' Star Wars universe. They are the main ground-force of the Galactic Empire, under the leadership of Emperor Palpatine and his commanders, most notably Darth Vader and Grand Moff Tarkin. The order of battle of the Stormtrooper Corps is unspecified in the Star Wars universe, but its numbers are far fewer than those of the Imperial Army's regular troopers. Despite this, the apparently high combat effectiveness of the Stormtroopers as well as their harsh reputation serve as the main reasons for deploying them almost exclusively in most of the military engagements of the Galactic Empire.

StarLite on the Web after adding the pictures and other data and links within the RAPS stock cards (POS software by the Software Clinic) ([RETAIL Home Industry](#)) www.magdasugarart.co.za

The screenshot displays the 'Sugar Art By Magda' website. At the top left is the South African flag. The main header features the brand name 'Sugar Art By Magda' in a blue script font, with 'Retail Catalogue' in a dark blue box to the right. Below the header, there are navigation buttons for 'Store location', 'Contact us', 'About Magda', and 'View cart'. A 'Retail Search Criteria' section includes a search bar and dropdown menus for 'Sections' (Sugar Art) and 'Categories' (All Sugar For Sale). The main content area is a grid of product cards, each labeled 'HAND CRAFTED' and showing an item with its price in South African Rand (R). Items include 'Micky Mouse Girl' (R40.00), 'Micky Mouse Boy 01' (R40.00), 'Horse Baby 01' (R40.00), 'Flowers X 9 Bouquet' (R250.00), 'Dragon 01' (R40.00), 'Dog Happy 01' (R40.00), 'Bunny Single' (R40.00), 'Bunny Large 01' (R95.00), and 'Bunnies Pair' (R65.00). There are also two larger sections for 'Cartoon Cake Decorations' and 'Christening Cake Decorations'. A 'Chocolate Egg Center' is featured in a large image on the left. A 'McAfee SiteAdvisor SAFE SITE' badge is visible. At the bottom, there is a social media widget for Nestor Guido (@Nestor_Guido) with a tweet about the website.

*Notice the different theme background. StarLite is very flexible in regards to backgrounds and colors that would compliment your stores color scheme.

***Note the currency symbol can be changed for the country of business**

Clicking onto a product will action a dialogue box to appear with a larger picture and retail information as well as giving an online customer the opportunity to interact: read the description of the product, view more information, view a demo YouTube/Vimeo video link, or purchase.

The screenshot shows a dialog box titled "Catalog Item Selected" with a close button (X) in the top right corner. On the left is a large image of a bouquet of hand-crafted flowers in various colors (pink, orange, white). To the right of the image, the text reads: "HAND CRAFTED", "Name: Flowers X 9 Bouquet", "Category: Weddings", "Shelf: 19/03/2015", "Price: R250.00", and "Stock Number: WD7". Below this is a "Summary" section: "Hand crafted 9 flower bouquet of sugar art cake decoration." A "Note" section follows: "Orders take +-2 weeks to complete depending on work loads. Also end products are similar to picture because of being hand made." An "Ingredients" section lists: "Sucrose, Glucose, Vegetable Fat, Thickeners, Glycerine, Modified Starch, Colourant, Acidifying agent and Potassium Sorbate(Preservative), Coloured Crystals, Water coloured paints." At the bottom of the dialog are three buttons: "Add to Cart", "View Cart", and "Close". Below the buttons is a section titled "You May Also Like These Stock Items" which displays two smaller product cards. The first card is for "Flowers Pink 01", labeled "HAND CRAFTED", with a price of "R95.00". The second card is for "Flowers Green 01", also labeled "HAND CRAFTED", with a price of "R95.00".

By inserting a small amount of html tags into the RAPS stock cards synopsis/description will result in the color and font size changes within the summary above. Refer RAPS stock cards at the beginning of this document.

The "You May Also Like" contains active links to other products.

***Note the currency symbol can be changed for the country of business**

Also notice the twitter blog at the end of the web page that a customer can scroll through. The store could make a workstation available on the floor to allow customers to browse the store inventory.

Another noticeable is the transparent annotations that are dynamically attached as the status of the stock levels change or these annotations can be placed by Management to describe an item as HOT HOT!!! Etc.

After or before reading visit: (www.starlightdemo.com) to take StarLite for a realistic drive and to have some fun.

The next few pages illustrate clicking onto the exposed buttons for the product chosen.

Asus Orion pro Gaming Headset:

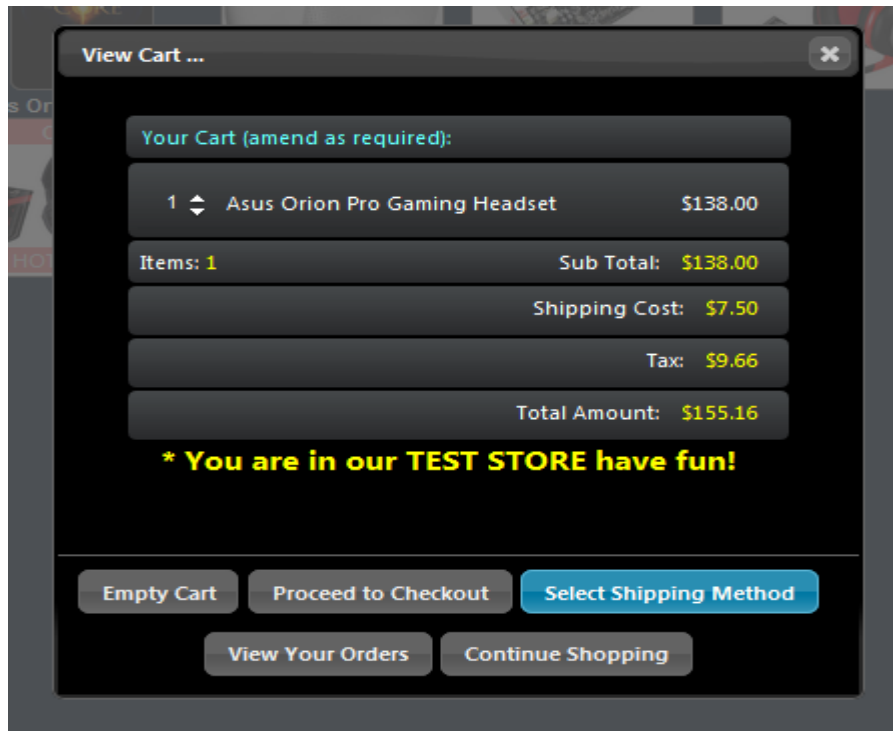

More Info button depressed: opens a light-box Window that's linked to the manufactures web-page for this product. A customer can then view further specifications and art work on the product. This link is managed and maintained within the stock card record in the RAPS database. Refer to www.softwareclinic.co.za for more information about RAPS. Notice the close button at the bottom of this illustration, by clicking onto it, this Window will be closed and the customer will still be in StarLite; meaning no hopping between web pages.

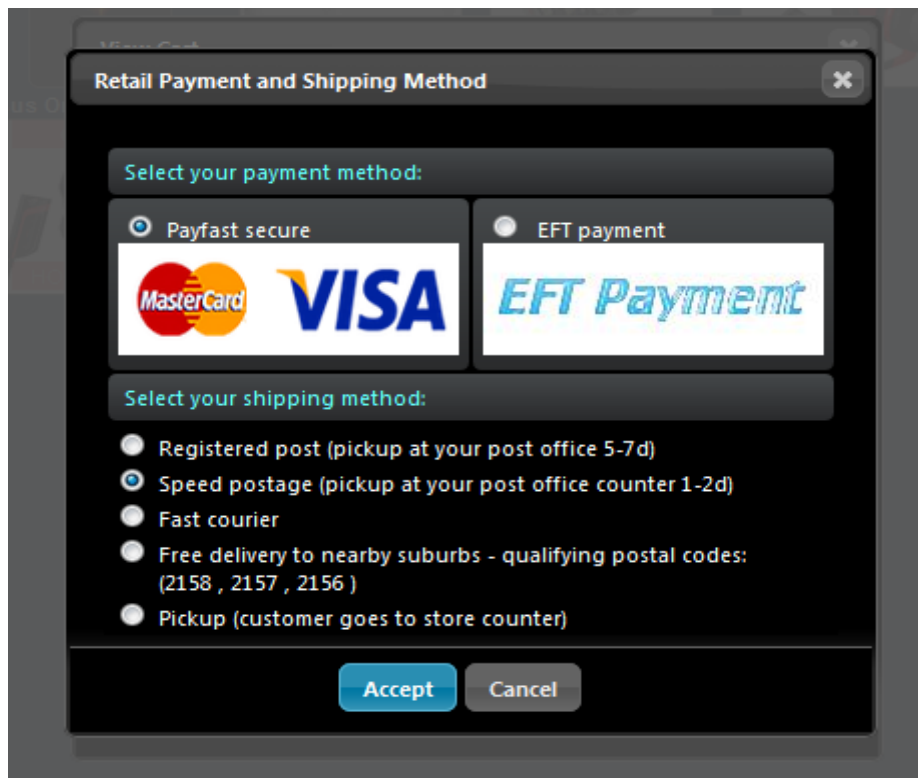

Demo button depressed: opens a light-box Window that's linked to a YouTube/Vimeo video demonstration of the product where the customer can view the product in action. Note store management could make their own YouTube demonstration video and link them into the relevant stock record within the RAPS database.

Add to Cart button depressed: opens a light-box Window showing that this item has been added to the shopping cart allowing the customer to continue shopping or to start the *Checkout process*.

Select Shipping Method button depressed: opens a light-box Window showing the customer a selection of payment and shipping methods that are available. A selection is then made by the customer.

Proceed to Checkout button depressed: opens a light-box Window showing the customer the input form where they must type in their delivery address and contact detail for the order. Once completed clicking onto the *Proceed to Checkout* button below will take them to the payment service provider's web page. The payment service provider could be PayPal /Payfast/EFT depending on which payment method was selected. Note if the customer confirms payment at the payment service provider that an email containing the INVOICE/ORDER document will be emailed to them.

From within the RAPS Point-of-sale software, incoming orders are selected and their statuses updated. A tracking number and customer communication can be added. Once an order has been updated and the update accepted an automatic email is posted to the customer with the latest Invoice/Order information.

StarLite summary

StarLite is a new web application that allows customers to interact with a brick and mortar stores retail and rental catalogue. This new web application works together with the RAPS (pos software) to provide a combined counter point-of-sale, with a complimentary Internet solution for their customers. StarLite provides a categorized reflection of the stores retail and rental inventory for online customers to interact with and at the same time have some fun using it. StarLite can be used from the comfort of homes, offices and or phone/tablets to do online purchases using their credit cards or EFT's; and if the rental component is activated customers can browse what rentals are available at the store and perform rental transactions.

Another powerful feature linked into StarLite is the ability to blog on Twitter and not be contaminated by other foreign tweets. Your pristine blog will be dynamically shown at the bottom of your StarLite Window. You can blog about any new happening or upcoming sales at your store.

Put the following Internet address into your web browser and come visit and test drive StarLite: <http://www.starlightdemo.com> and read our twitter StarLite blog.

How does StarLite work

- 1) StarLite requires an ADSL line with a router that has access to the Internet; we can assist your technician in setting this up if required. Also require will be a URL/DNS ...example: *www.YourUrl.com* purchased from www.dyn.com (or a similar service provider). *We can assist in the purchase of a URL if required.*
- 2) StarLite works with Microsoft Windows 7/Windows 8 and future versions of Microsoft Windows which already comes installed with a local Internet web server called IIS. It just needs to be switched on. It is not difficult to do and we will be there to help.
- 3) The StarLite package will need to be installed by the Software Clinic. This will be done through the Internet application (www.TEAMVIEWER.com)and with the permission of the store owner.
- 4) Once StarLite is installed the store's inventory catalogue will immediately become visible on the Internet and can be visited by your customers whom have your URL DNS address to StarLite ...example: www.YourUrl.com .
